

# SHORT OF HOUSES, AS SEASON OPENS NEED STILL MORE

Condition In All Upper Glades Communities Is Matter of "Anxious Concern"

WIDE PUBLICITY GIVEN BY ASSOCIATED PRESS

Local Capital Is Absorbed In Farm Operations, None For Construction

A degree of concern amounting to anxiety is being exhibited over the housing situation in the territory from St. Lucie canal south through Canal Point and Pahokee and on to Jupiter, Belle Glade and South Bay to the west line of the county.

The conduct of business is hampered by the lack of office rooms for men in the produce trade for by the necessity of sending them to the east to get hotel rooms and back the next morning to transact the day's business.

Another angle is the danger to public health in the gathering of migratory workers crowded in unhygienic quarters, the introduction and spread of disease, being made likely by the lack of drainage system and the lack of facilities for the disposal of waste matter from camps occupied by the introduction of municipalities.

Under a display heading, a front page article in the Palm Beach Times of Saturday gave publicity to the need in Belle Glade and Pahokee for more dwelling houses. The article recalled that last fall, winter and spring there was an acute shortage of housing in the

## The Glades And Its Affairs

Printed in this issue of the newspaper is the statement of the late of the Everglades. It is not juvenile and jingo, expatriation by a Miami lawyer, but a sane and made himself the attorney for the drainage board. It is the well reasoned opinion of the federal court for the Northern district of Florida, the opinion written by Judge Strum, a Florida man, and concurred in by Judges Bryan and Sheppard. It is hard reading for persons not familiar with the history of the Everglades but it is well reading and studying by all who undertake to take about the affairs of the big drainage district.

In the first place the court holds by majority opinion that the Internal Improvement Fund of the state of Florida is obligated for the drainage of the Everglades, because Chapter 610, Acts of 1885, 1887, 1891, 1893, 1895, 1897, 1899, 1901, 1903, 1905, 1907, 1909, 1911, 1913, 1915, 1917, 1919, 1921, 1923, 1925, 1927, 1929, 1931, 1933, 1935, 1937, 1939, 1941, 1943, 1945, 1947, 1949, 1951, 1953, 1955, 1957, 1959, 1961, 1963, 1965, 1967, 1969, 1971, 1973, 1975, 1977, 1979, 1981, 1983, 1985, 1987, 1989, 1991, 1993, 1995, 1997, 1999, 2001, 2003, 2005, 2007, 2009, 2011, 2013, 2015, 2017, 2019, ### WHO DOES HE SPLIT WITH?

Residents of south Florida who are interested in the establishment of a cross-state waterway utilizing St. Lucie canal, Lake Okechobee and Caloosahatchee river should carry in mind that there are two other cross-state waterway projects in Florida. Appropriations of public funds by congress are sought for each of them.

Of the two cross-state canal projects north of St. Lucie canal there is information in newspaper clippings that are at hand. One of the clippings is a dispatch from Lakeland and relates that "E. K. Callaway, former legislator, and his son, will join A. P. Knotts of Yanketown, Fla., at Washington to lay before the Reconstruction Finance Corporation plans for the proposed cross-state barge canal advocated by Mr. Callaway. This Mr. Knotts is a Republican long active in the affairs of his party. It doesn't appear that he gets a salary—he acts on his own account to use his own influence without charging for it."

The other clipping is from the Jacksonville Times-Union of August 18. It tells of the "proposed Gulf-Atlantic Ship Canal" and counts of an economic survey is to be made by the bureau of foreign and domestic commerce of the Department of Commerce at the request of the War Department. Much data to be in the "proposed Gulf-Atlantic Ship Canal" project has already been assembled, contained in a report made last year, the Times-Union says, for the City of Jacksonville by Hills & Youngberg.

This Hills of Hills & Youngberg is George B. Hills, member of the State Road Department, "personal representative in Florida of Franklin D. Roosevelt," consulting engineer of Okechobee Flood Control District and one of the true virate directing the state Democratic campaign. In view of his other connections we wonder how loyal to the party he is.

At last report Hills was still on the pay roll of Okechobee Flood Control District at \$8,000 a year. For what? Is Okechobee Flood Control District paying him to promote a rival cross-state canal?

Or is the district financing him in his conduct of Franklin D. Roosevelt's campaign while he claims an influence with the Republican administration at Washington sufficient to get appropriations for our St. Lucie-Lake Okechobee canal which we would not get otherwise? If money for cross-state canals is so easy to be had that there are to be three of them, the \$8,000 a year paid to Hills by the Flood Control District appears to be graft. Who does he split it with?

### IN LIEU OF GOLF

The Editor's Own Column

"Listen to what a Pahokee man says about it. 'I've been in a lot of tight places in my life and I always got out of them by working myself out, not by sitting down and waiting for someone else to get me out.'"

Mr. Chairman, I rise to place in nomination for the high office of Post Laureate of the Pahokee Bean Festival that eminent Golf Screamer of the Tampa Morning Tribune, P. E. R., that when there is no thauwhommer, in recognition of the splendid service to string beans done in the noble poem of which he is the author.

I DO NOT CARE FOR TURNIP GREENS BUT I CAN LIVE UPON STRING BEANS.

When this election has been made by unanimous acclamation as I am sure it will be, I shall move that P. E. R. be escorted to the platform, seated on a bean hamper at the right of the Chief Bean Grower, a garland of bean vines draped upon his noble brow and he be given a Coca Cola can of the best evergreen wine.

A little item in the Okechobee News that said W. H. Douglas, formerly of Lake Okechobee, has a hog ranch at West Palm Beach interested me very much. Mr. Douglas lived contentedly on the shore of the lake for many years, until he was asked to leave by the state where it is hoped he can resume the placidity of existence that was disturbed by the march of progress in the Lake Okechobee country. The item interested me because of the reminder it brought of something that happened in West Palm Beach about 15 or 16 years ago. This early "hog ranching" to do with, hog ranching.

When Donald Herbert Conkling

decided to separate the job printing business from the Palm Beach Post newspaper business he got the printer's friend T. R. Puckett to come down from Brevard county to try to sell the job printing business. Backing up his selling talk, D. H. took T. R. over to Palm Beach; he pointed out the palaces of the millionaires, the magnificent hotels, the golf courses, the bathing pools—he told how wealth and fashion assembled there. D. H. was anxious to get rid of that job shop and he spread in on thick. Concluding a burst of eloquence he asked T. R. "What do you think of it?" Puckett had lived in Texas before he came to Florida. "Well," he said, "it looks to me like when they did all this they spent a country that would do fine for a hog ranch." Mr. Douglas, from Douglas Beach seems to have apprehended the possibilities that Mr. Puckett discerned years ago.

Persistence of the Question News in calling state road No. 25 "Sugarland highway" indicates that although the state is to change on the Cleviston paper, its policy has the dictatorship of yore. Persistence in the old highway is improper term for the portion of the highway that is in Palm Beach county, beyond that point. If it is to be a highway to the local economy, it could be called "framed highway," or "Wire-trail," or "Hange Cove Road."

Not all of the affairs of the Glades have to do with such unpleasant things as taxation—items in the newspapers, in the Lake Okechobee region show that the people have broad interests. For instance, at Krome Haven recently. There was a boxing bout between Lindsay Mathis of Moore Haven and Edward Brunson of Belle. The judges awarded the decision to Mathis, at which there was a great cheering. The crowd, however, the judges announced that Brunson won the fight, which brought complaint from another side of the crowd. The judges then declared the fight a draw; which the Glades County Democrat says, is a large part of the prize fight. Names of the prize fight judges are not given by the Moore Haven newspaper but their successful policy is so much like that which is employed at Tallahassee as to suggest that the directing genius of the I. L. Board has been among them.

### GLADES AFFAIRS

Continued from Page One

improvement district. Because this is so the Federal court can properly say, supported by a long string of decisions in similar cases: "Though the state cannot by contract surrender its sovereign prerogatives in the performance of essential duties, nevertheless when the state authorizes the FANING SUBDIVISION to contract by issuing bonds and to exercise the power of LOCAL taxation to the extent necessary to meet such obligations, the power, thus given CANNOT BE WITHDRAWN so long as it is necessary to satisfy the vested rights of bondholders. In such cases the state and the subordinate taxing units are equally bound."

With Chapter 610, Acts 1935 still in effect, making it the duty of the state to carry on the requirements of the congressional act of 1850 which donated government land, the legislature in 1917 directed the trustees of the internal improvement fund to become the purchasers of all tax certificates for which there was no other purchaser, thus preventing tax delinquency and consequent depletion of the district fund available for interest and sinking fund requirements, and the trustees complied with the law until 1917. The Federal court holds, and this is the law of the Everglades, that by the act of 1917 the trustees hold the tax certificates under Chapter 610 of the Acts of 1935.

W. L. Evans of Miami, to whom was given a high salary to protect the interests of Everglades drainage district, playing his petty politics and piddling with empirical

formula, tried to set aside the building that Chapter 610, Acts of 1935, provided for the drainage of the Everglades "and any settlement and cultivation of the lands," and tried to deprive the taxpayers of the benefit of the drainage. Internal Improvement Fund that the Act of 1917 provided. That may not have been his conscious purpose, but that would have been the effect if his argument had been accepted in the Federal court decision.

Land owners and taxpayers in the Everglades should understand that the decision of the Federal court was in favor of the drainage district and against the Internal Improvement Fund—there are certain obligations (bonds) against the lands of the district, these obligations must be paid, and if the obligations are not paid in part by the trustees of the Internal Improvement Fund, then they must be paid chiefly by the small farmers whose homes are subject to the contract obligation of the legislature made by the owners of small tracts, because most of the big companies have quit paying drainage taxes.

It is not the Everglades News that says W. L. Evans made the wrong policy look good on the board—this is a gold-miner of Federal jurisprudence sitting as a Federal judge who may so by rejecting his arguments and rendering a decision that saves the private land from the district, upon the consequences of Evans' fantastic theories.

### Observations

Thoughts that occur to me as I look over the morning paper: "Stroking down on the path of Mayor Walker of New York is the question that I would not believe myself defense of him has friends in the city for his friends have any sense of proportion they are in the judgment of the call Javor Lennix, Walker's policy isn't complimentary to him. That would be a disaster, a blow in his path. A cloud-burst at Lexington, Ky. called a flood that did nothing to the danger. There isn't any place in the world where Nature doesn't put in a rampage once in a while. Financial writers acknowledge that the purpose of a spike tax is to transfer a cost of government from the front of the pocket, because the poor are always trying to get the government to tax the rich. Some funny when a poor man argues for the spike tax. "It's like a goat horse. But do you recall any athlete who ever amounted to anything? Professor Bishop puts in a lot of time trying to make foot ball champions out of boys who can't learn to spell or write legibly or add a column of figures. President Hoover made a good straddle of the liquor issue. Truth often lies half way between extremes. When a man is killed under circumstances that are called murder there is a great howl about it, but it isn't any deadlier than a child killed by a drunken driver of an automobile who goes free because he delivered a block of votes to the politicians who get elected as sheriff and state attorney. Every time I read about a new post office building I think of the collector who came around and takes 5 per cent of the postmaster's salary for the Republican campaign fund. Properly land just around the corner, see President Hoover wouldn't find it necessary to call that general business conference. If business is getting good, let it alone. Racing tracks and gambling houses are outside of Miami city limits and merchants don't see why they should make up an advertising fund to bring in tourists who spend their money with the gamblers instead of buying merchandise. Bootleggers and operators of bolita games don't pay any taxes, either—that is, not that go into a community advertising fund. The women politicians don't seem to be getting anywhere for the improvement of morals."

### ARE SEED LOANS A BENEFIT?

Glades County Democrat.

Congress authorized loans for the sole purpose of providing seed and fertilizer for the farmers who would otherwise not be able to put in a crop.

Farmers have taken advantage of this fact, and look on the loans as a gift from the government. Too many of them seem to feel that the world, particularly the federal government, owes them a living and if they are willing to put up the labor and use their land the government, certainly should give them money to buy seed and fertilizer.

The federal farm loan representative who last visited this section said that many farmers had not made even the slightest effort to repay their last loan; he said that even the payment of 30 cents occasionally would indicate a willingness to pay but that many of the farmers of the Everglades section who received farm loans had not paid a nickel on them. Incidentally, he indicated that such attitude certainly does not encourage the farm loan board to extend future loans to these people.

Do you thrill to a red-blooded fight? Then this is a gold-miner of Federal jurisprudence sitting as a Federal judge who may so by rejecting his arguments and rendering a decision that saves the private land from the district, upon the consequences of Evans' fantastic theories.

### PLANT SWEET PEAS NOW FOR CHRISTMAS BLOOM

September and October are the months for planting sweet peas, says W. L. Floyd, professor of Agriculture in the College of Agriculture. Those planted in September will make flowers by Christmas while those planted in October should bloom in January.

A trench should be dug and the seed dropped in about one inch apart. They are then covered about two inches deep, leaving the remainder of the soil in a ridge beside the trench. As the seedlings begin to come up the soil is worked over until the ground is level.

When the plants reach a height of two or three inches they should be thinned to a distance of four inches apart. Light poultry wire makes a very good support. Sweet peas require a large amount of water.

If red spider or plant lice attack the plants spraying and dusting will be necessary. Dust the red spiders with sulphur and spray the lice with tobacco extract.

### COMMENT, "YEAH?"

Official information from Tallahassee indicates that the bids for Kissimmee river bridge will be advertised for as soon as the plans of the engineers for the bridge have been completed. Okechobee News.

### COMMENT, "YEAH?"

Official information from Tallahassee indicates that the bids for Kissimmee river bridge will be advertised for as soon as the plans of the engineers for the bridge have been completed. Okechobee News.

## TAMING the 'GLADES' With OLIVER POWER

is now an easy accomplishment with our EVERGLADES FARMERS... not one, but many have found this ACTUALLY a easy matter. In the past it was only possible to LOOK at those waste lands. Now you can WORK them for the tremendous PROFITS they produce.

Take the little "bear-cat" of them all... the OLIVER 18-28 TRACTOR

When the plants reach a height of two or three inches they should be thinned to a distance of four inches apart. Light poultry wire makes a very good support. Sweet peas require a large amount of water.

If red spider or plant lice attack the plants spraying and dusting will be necessary. Dust the red spiders with sulphur and spray the lice with tobacco extract.

CHEVROLET

You can't get away from the fact that

A SIX IS MORE ECONOMICAL

Thousands of tests have proved... engineers have established... owner experience has confirmed THIS FACT: For lowest, all-round motoring costs: SIX CYLINDERS. No more... No less!

With more, you sacrifice the economy for which Chevrolet is so famous. With less, you sacrifice the kind of maintenance cost that Chevrolet gives you—the lowest available in today's low-price market!

SAVE WITH SIX CYLINDERS

Why not, strike a happy balance between "too many" and "too few"? Do as the majority of low-priced car buyers have done ever since January, 1931: SAVE—with SIX CYLINDERS. The Chevrolet six-cylinder engine gives you wonderful mileage on gasoline—and all because its smoothness is built-in—the body, chassis and engine are spared the repair costs that result from constant, inherent vibration!

Remember that you can switch to a 1932 Chevrolet for very little money. In fact, you'll probably find it more economical to buy a new Chevrolet Six than to worry along with the old car.

## BELLE GLADE

H. C. Wilson has been designated as principal of the Belle Glade school. This action of the school board and School Superintendent J. A. Youngblood completes appointment of school principals in preparation for the coming term. Wilson was a teacher at the Belle Glade school last year.

The Belle Glade Home Demonstration Club will meet at the home of Mrs. G. E. Tedder at 2:30 o'clock today.

Mrs. Allet Greer has returned from a visit to Miami and West Palm Beach.

Mrs. and Mrs. J. F. Scullen have returned from a visit to Miami. Mrs. Scullen's mother, Mrs. Minnie Holmes, accompanied them and expects to visit here for several weeks. They all motored to Fort Pierce Sunday.

Miss Nan Martin Allen and Miss Mary Porter Allen have returned from a tour of the west, where they accompanied a party of school friends. They are making preparations to enter college next month. Miss Nan Martin will attend Duquesne in Philadelphia this year, while her sister, Mary Porter, will finish her course in Florida State College in Tallahassee.

Mrs. and Mrs. G. R. Harris and family are spending this week in Fort Lauderdale and Miami.

Mrs. and Mrs. Harry Linder have returned from Fort Lauderdale, where they have been spending the summer months.

Dr. and Mrs. George Parker have returned from several weeks' visit with relatives in Alabama.

Mrs. B. V. Crech and family have returned from a month's stay in Fort Lauderdale.

## AROUND THE LAKE

Mr. and Mrs. Jim Darden have returned from several weeks visit to Knoxville, Tenn., where they visited friends and relatives.

Mr. and Mrs. Walter Scholter and son are visiting Mrs. Scholter's brother-in-law and sister, Mr. and Mrs. Fritz Stein, in Miami this week.

Mrs. Frank Blake of Fort Lauderdale, is visiting Mr. and Mrs. Fred Atanaps this week.

Mrs. Alvin Kirchman and daughter left Tuesday for several days visit with her mother, Mrs. Margaret Bos Der in Miami.

Ben Halpein has returned from several weeks visit to South Carolina.

Mrs. Maude Thompson has left for Miami, where she will visit relatives for several weeks.

Mrs. C. T. Pomberton has returned from a visit with relatives in Tennessee.

Mr. and Mrs. J. R. Neller have returned from a month's vacation trip to Missouri and Minnesota.

The Vacation Bible school, under the direction of Miss Ruth Alexander of Miami, which was in session for two weeks at the American Legion hall, gave a program at the Legion hall Sunday evening at 8 o'clock, instead of the regular church service. The children gave songs and drills.

Mrs. Katherine Smith of Arcadia, departmental president of the American Legion Auxiliary, and Mrs. S. C. Lutz of Galesburg, Ill., were guests of Mrs. George Tedder, hostess, at a rich dinner given at the home of Mrs. George Tedder, Thursday evening of last week.

The best distinct of use is a 1-1000 solution of corrosive sublimate. Simply tie the seed loosely in the cloth bags, and soak them in the solution. He suggested 15 minute treatments, for cabbage, cauliflower, melons, and 8 minutes for tomatoes, peppers, and eggplants. While the seed are being treated they should be stirred occasionally. Old newspapers make a convenient place on which to dry them. When dry they are ready to plant. Such diseases as angular leaf spot, anthracnose, blight, and bacterial blight are prevented by the treatment.

Corrosive sublimate is a deadly poison, and should be handled accordingly. To make a small amount of the solution one tablet dissolved in one pint of water is suggested. For larger amounts one ounce of the crystals may be dissolved in 7½ gallons of water. The solution should not be put in metal containers, since it will react with the metal.

A new Novaro-virile... aggressive... smashing his way through the most powerful role of his career as the mill hand in "Huddle" at the Prince Theatre, Saturday and Sunday.

## SOUTH BAY

SOUTH BAY, Aug. 21.—A special meeting of the 4-H Club girls was held at the H. C. Willis home Wednesday afternoon, Friday, September 2 was the date set for the annual luncheon to be given for the 4-H high school graduate.

A general outline of short course work was given by Sylvia Fiege, who was the 4-H health representative at Tallahassee this year. Emily Olson gave an outline of the work accomplished at the 4-H camp at Palm Beach. Those present were: Mrs. Barrus, Madeline Gordon, Sylvia Fiege, Emily Olson, Annette Ehem, Bonnie Parker, Olive Welch, Clara Belle McKee and Edith Willis.

Julia Crocker of Delray is a guest of Edith and Alice Willis during the week end.

The home of Mr. and Mrs. W. H. Rawle was the scene of a lovely B. Y. P. U. party given by group one as the losers in a recent contest. A group of spirituals was given by Mrs. J. W. Rashley, Mrs. M. D. Hardy, Mrs. M. C. Hardy, Miss Genevieve Brown, Mr. George Veazey and Mrs. George Veazey.

A piano duet was played by Mrs. Rawle and Louise Rawle. Games were enjoyed under the supervision of the committee, Miss Genevieve Brown, Mrs. George Veazey and Roy Boots. Cake and punch were served by Mrs. M. D. Hardy, Mrs. M. C. Hardy, Mrs. George Veazey, and Mrs. W. H. Rawle.

**GET THE CHILDREN READY FOR SCHOOL.**

"Physical defects of children should be cared for before the children return to school," says specialists of the Home Demonstration staff of the State College for Women in calling attention to the fact that school days are again here.

"It is now recognized that much of the listlessness, laziness, and ill-health in school children may be caused by poor physical condition rather than by any mental peculiarity or defect."

These specialists also point out the necessity of having the children form regular habits and thus keep in better physical condition. Irregularity in eating is one of the principal bad habits easy to acquire during the summer vacation, and letting the child eat when and what he wants and to have snacks between meals whenever he wishes is bound to develop bad food habits which may leave permanent effects on his physical health.

A definite mid-morning or mid-afternoon lunch of milk and bread or fruit may be given regularly if the child needs food between the regular meals. Under no circumstances should the child be allowed to nibble sweets continuously between meals.

Regular sleeping habits should also be encouraged and carried out, even on Sundays, to prevent congestion, nervousness, and sleeplessness.

Every member of the family should have an annual physical examination by the family physician. Especially is this true of the children, in whom defects may be detected and remedied at the beginning, when these same defects might grow and become serious handicaps later on.

## 1114 FREE TEXT BOOKS

**FOR GLADES COUNTY**

Free text books to the number of 1,114 for the first six grades have been received at Moore Haven by M. S. Hays, county superintendent. This is not enough but old books will be used also. The Palm-dale school will be closed and its pupils transported to Moore Haven. Glades county providing some of the school houses and buses, the drivers but for Palm-dale gave a contract to Henry Douglas at \$70 a month, L. R. Bates is to get \$45 a month for driving the Lakeland bus.

## SURFACING ROAD NO. 25

Surfacing of state road No. 25 between Clewiston and Labele was started last week by A. O. Graynolds of West Palm Beach, who was recently awarded contract by the state road department. The contract calls for completing 21 miles of the highway and is divided into two projects.

It has been estimated that the work will be completed in about 40 days. Slag is being placed scattered on the surface of the road.

**OIL REPLACES "STANDARD" MOTOR OIL**

Hydrofining, developed by Standard Oil scientists, is an advanced process which makes the hydrogenation of motor oil commercially possible at the price of ordinary motor oils. Briefly, the process of making hydrofined ESSOLUBE consists of mixing a high grade crude oil fraction with pure hydrogen gas compressed to 3500 pounds per square inch.

This mixture is fed into a fired coil of pipes where it is heated to an extremely high temperature—800 degrees Fahrenheit. It is then passed into a reaction chamber where, in the presence of a secret "catalyst" or "transforming agent," the oil molecules are ripped apart, the hydrogen reacts and changes the basic chemical structure of the oil. The mixture is then cooled, and whatever hydrogen or other gas is present is removed.

The partly finished oil is run into stills where, under vacuum, the gas oil and gasoline are removed and the lubricating oil divided into several "cuts." Each cut is then de-waxed and treated to insure stability and remove any remaining impurities.

Since the oil is subjected to high temperatures and enormous pressure during the manufacture, only the parts of the oil that can withstand these conditions—many times more severe than occur in any automobile engine—are left for ESSOLUBE.

This insures an oil that will stand up under severe operation more perfectly than any motor oil ever before produced.

**STANDARD OIL COMPANY**  
INCORPORATED IN KENTUCKY
